

WAHEN – opening up higher education to millions

The World Access to Higher Education Network (WAHEN) is pleased to announce that membership is opening to higher education institutions (HEIs), NGOs, and other organisations working to advance equity and access in higher education. Despite its power to transform lives, drive social mobility, and support sustainable development, higher education remains out of reach for millions across the world. WAHEN is the global organisation dedicated to equitable access & success in higher education opening it up to all who can benefit based at Ruskin College, Oxford.

Our vision is that: **Everyone from minority or disadvantaged majority populations should be able to benefit from participation in higher education.**

Meaningful change requires collective action. WAHEN enables organisations to build new global partnerships, transform who enters and succeeds in higher education, shape policy and practice and meet the challenges to global higher education posed by the changing social and political climate.

Why join WAHEN?

- ◆ Participate in and lead any of the 8 themed WAHEN Global Communities covering policy, data, AI, international student mobility, finance, leadership and student support.
- ◆ Exclusive invitations to WAHEN partnership roundtables with UNESCO, World Bank and others.
- ◆ Convene WAHEN branded activities to build new partnerships.
- ◆ Exclusive publishing opportunities in leading academic journals.
- ◆ Three exclusive global equity research briefings per year.
